ONU Secure Mounting Box
TEN-FW015

Features and Benefits

This mounting box is designed to prevent accidental damage or interference to ONUs when installed inside a property. It also provides support for incoming cable management and fibre splicing, all held discretely under a cover which forms the basis to mount the ONU on to. The mounting box is designed to fit over existing wall mounting boxes and use the same fixing centres to attach this mounting plate in place of the existing wall box cover.
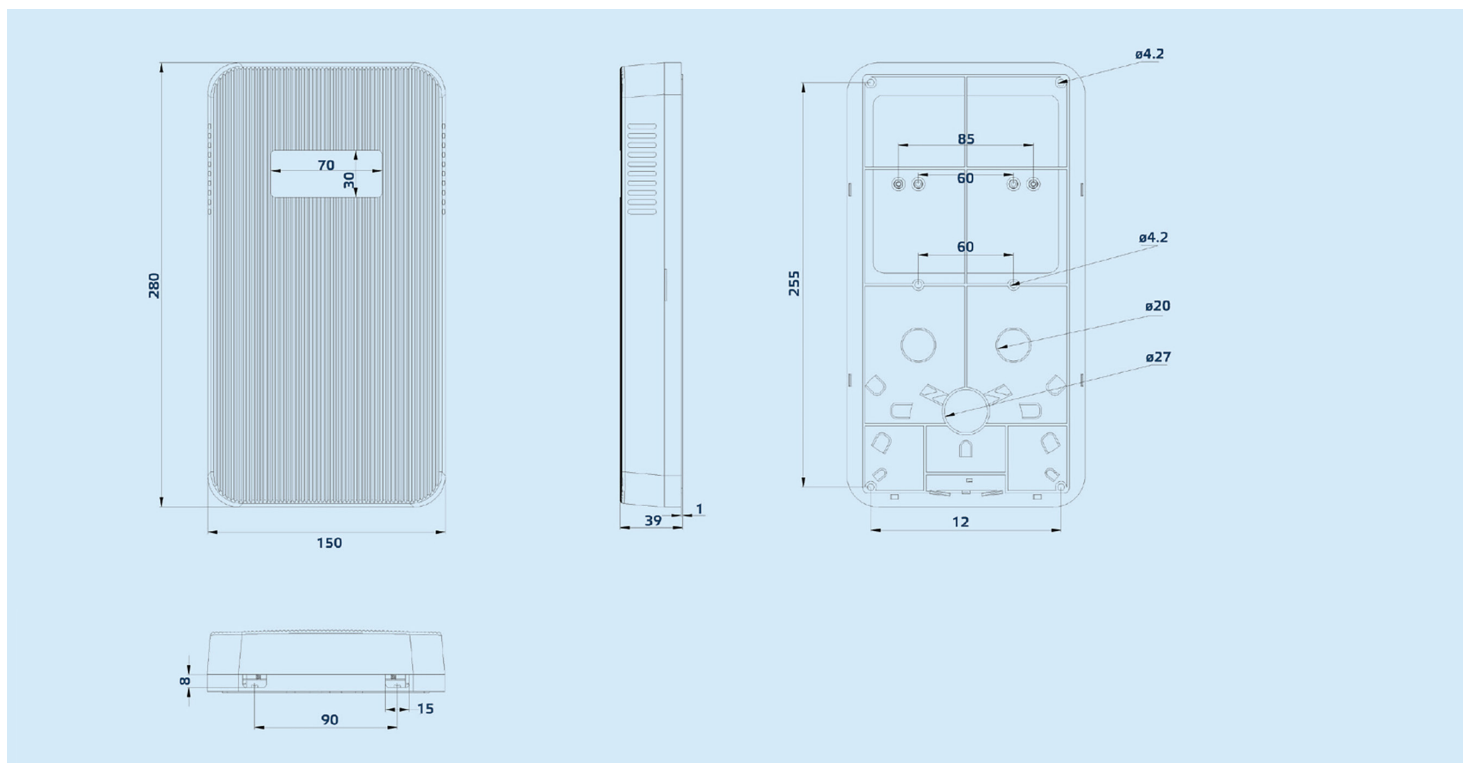

- **Prevents Accidental Damage or Interference to ONU**

- **Secure ONU Mounting onto a Wall**

- **Supports Different Size ONU's**

- **Multiple ONU Securing Points**

- **Incoming Fiber Cable Management & Spare Coiling**

- **Fiber Splice Holder Position**

- **Fits onto Back Box using Same Fixing Positions**

- **Supports Ethernet Cable Connection to ONU**

- **Supports Power Cable Connection to ONU**
